Summarizing Features

- The Clevis Hitch is the only hitch that allows adjustable height. This is necessary on units with oversize tires or with drawbar tractors.
- The Clevis Hitch is the only hitch that may have safety chains as an option.
- The Spring Hitch is the only hitch that provides a cushion of flexibility for the load when starting or stopping your unit.

Type of Hitch	Fixed Height	Adjustable Height	Double Bolt	Triple Bolts	Safety Chains	Springs Cushion Load
